JOURNAL OF PHYSICS C
SOLID STATE PHYSICS
1969—SER. 2, VOL. 2

SUBJECT INDEX

PAGE

Aberration, chromatic, in electron microscopy 2290
Absorption bands of gadolinium in ferromagnetic and paramagnetic states 97
Absorption edge, shifts in x-ray L_{III}, of ^{80}Hg and ^{81}Tl due to chemical effects . . . 104
Absorption, fluorescence spectra of crystalline *trans*-stilbene 1560
Acetylacetonate, Cr: Al, spin–lattice relaxation of 1376
Acoustic paramagnetic resonance of vanadium doped magnesium oxide 1759
Acoustoelectric currents, high-frequency, in thin platelets of CdS 175
Acoustoelectric domains in piezoelectric semiconductors . . . 1299, 1307, 1321
Ag–Pd–Cd alloys, thermopowers and resistivities 2114
Alkali halides, interaction with platinum 1392
Alkali metals, electrical resistivities of, to pressures of 600 kbar 680
Alkaline earth fluorides, dielectric response of 1595
Alkanoates, manganous, magnetic susceptibility of (L) 2431
Alloying behaviour, perturbation formalism 1285
Alloying behaviour, perturbation theory of mercury–magnesium 1293
Alloy CuAU II, entropy of disorder in (L) 760
Alloyed chromium, magnetic studies of by neutron diffraction 238
Alloys, Ag–Pd–Cd, thermopowers and resistivities 2114
Alloys, dilute, effect of localized states on impurity soft x-ray spectrum of . . . 1474
Alloys, dilute, of iron in gold, study using Mössbauer effect 1258
Alloys, dilute magnetic, resistance due to potential scattering 2099
Alloys, dilute, modified exchange interactions 1670
Alloys, dilute, of copper and silver, Hall coefficient 1272
Alloys, Fe–Ni Invar-type, ultrasonic relaxation in 2107
Alloys, ferromagnetic cobalt–vanadium, nuclear magentic resonance in 259
Alloys, ferromagnetic Pd–Co and Pt–Co, low-temperature specific heats of . . . 135
Alloys, GaSb and GaSb–InSb, phonon scattering by acceptor defects in (L) . . 1353
Alloys, iron–palladium–hydrogen, Curie temperature and lattice parameters . . . 2120
Alloys, long-period superlattice, electronic states in 733
Alloys, palladium–silver, thermal expansion of at low temperatures 769
Alloys, silver–palladium, band structure effects 2089
Alloys, sintered semiconductor, thermal conductivity of 147
Alloys, Ta–Nb and Nb–Mo solid solution, lattice thermal conductivity of in normal and superconducting states 629
Alloys, theory of ferromagnetic 124
Aluminium, calculation of optical properties of 102
Aluminium, galvanomagnetic effects in, studied by means of helicon resonances . . . 694
Anharmonic contribution to the Helmholtz free energy of a simple crystal model, temperature dependence of anharmonic contribution 1542
Anharmonic effects in thermodynamic properties of solids . . . 210, 385, 393, 1105
Anharmonicity, influence of, on parameters of exponential potential for heavy rare gas solids (L) 190
Anisotropy, magnetocrystalline, in terbium and dysprosium 1016
Annealed chromium, magnetic studies of by neutron diffraction 238
Annealing of F centres in lithium fluoride in temperature range 25 °C to 400 °C . . . 18
Antiferromagnetic NiO, MnO and α–MnS, magnons in 874
Antiferromagnetic order in copper–manganese alloys 959
Antiferromagnetism, absence in isotropic Heisenberg model with long-range interactions of 1531
Antiferromagnetism in Au_3Mn_2 356
Antiferromagnetism of γ FeOOH, Mössbauer study 1996
Antiferromagnets with K_2NiF_4 structure, optical properties 2012
Antiferromagnets, two magnon spectra of 1630
Antimony at low temperatures, thermal expansion of 116

PAGE

Argon and krypton, electron diffraction study of solidified mixtures of 220
Argon and neon, electron diffraction study of solidified mixtures 220
Argon, solid, isotopic differences in 0 °K volume and sublimation energies of . . corr. 192
Atomic beams, high-energy, condensation of 200
Atomic motion in liquid sodium 2047
Au_5Mn_2, antiferromagnetism in 356

Band model of magnetism, forced magnetostriction in 68
Band structure, approximate calculation of 1222
Band structure calculation for transition metals 1051
Band structure calculations of noble metals, potentials 1822
Band structure effects in silver–palladium alloys 2089
Band structure, electronic, in diamond-type semiconductors 719
Band structure, electronic, time-reversal degeneracy in 1425
Band structure of α- and γ-cerium (L) 924
Band structure of indium 661
Band structure, gold (L) 1886
Band structure, transition-metal, calculation of 833
Band theory, one-electron wave functions in, possible use of equations for modulus and phase of 107
Bernoulli potentials in superconductors 1334
Beryllium in cadmium telluride, infra-red absorption of 1129, 1137
Beryllium, superconductivity in thin films of (L) 382
BeO, covalent and ionic models for electric field gradient in 2301
Bismuth at low temperatures, thermal expansion of 116
Bismuth-doped calcium oxide, stress and Zeeman spectra in 37
Bismuth seleno-telluride, pulsed neutron diffraction measurement of preferred orientation in pressed powder compacts of 870
Bismuth, size effect in electrical conduction of 824
Bismuth, thermal expansion of at low temperatures 575
Boltzmann equation 1446
Boron in gallium phosphide, infra-red absorption of 2402
β brass, force constants 1872

Cadmium arsenide, magneto-Seebeck and Nernst effects in 2138
Cadimum arsenide, thermal conductivity 2138
Cadimum sulphide, paramagnetic resonance of impurities in 1416
Caesium halides, moment functions of phonon spectrum (L) 1695
CaF_2, trapped hole centres in 1590
Calcium oxide, bismuth-doped and undoped, stress and Zeeman spectra in . . . 37
Calcium oxide, paramagnetic resonance of N centre in (L) 1101
Capacitance enhancement resulting from interaction of platinum with alkali halides . . 1392
Capacities, heat, of NaCl, KCl and KBr 385
Carbon and carbonaceous materials, inelastic electron scattering in 2290
Carbon–carbon bond length in potassium graphites 1732
Cavitation pressure of liquid helium 1877
CdS, thin platelets of, high-frequency acoustoelectric currents and departures from Ohm's law in 175
Ce^{3+} in $LaCl_3$, pulsed field Zeeman studies of 2310
Cerium, α- and γ-, band structures of (L) 924
Chains, liquid, non-exponential range of localized electron states in 1502
Chains, short-range disordered, electron state density in 972
Charge distribution in niobium monocarbide 1984
Charge transfer, covalent, in III–V compounds 816
Chlorides, rare-earth, coupled Ising chains and magnetic ordering in 75
Clean surface 996
Clusters, exchange-coupled, cross-relaxation with single ions 1413
Cobalt–vanadium alloys, ferromagnetic, nuclear magnetic resonance in 259
Coercivity, temperature dependence of, for a random array of domain particles . . . 1537
CoF_2, spin-wave contribution to specific heat of 2329

PAGE
^{59}Co hyperfine field in $GdCo_2$, spin echo study of 2237
Collective effects in nearly ferromagnetic metals (L) 1693
Collective motion in liquids 536
Co_2MnSn, internal field at ^{119}Sn nuclei in 2037
Condensation coefficient of liquid helium II 2414
Condensation of high-energy atomic beams 200
Conduction, anisotropic pressure dependence of, in well-oriented pyrolytic graphite . 1742
Conduction, two-current, in ferromagnetic metals and spin-wave electron collisions . 1784
Conductivity, electron bombardment, of amorphous dielectrics, columnar ionization in . 152
Conductivity, electron bombardment, of dielectric films, threshold energy in . . 159
Conductivity, ionic, of potassium iodide crystals 167
Conductivity, lattice thermal, of Ta–Nb and Nb–Mo solid solution alloys in normal and superconducting states 629
Conductivity of insulators 2181
Conductivity, static electrical, for disordered systems, non-perturbative evaluation of . 288
Conductivity, thermal, of cadmium arsenide 2138
Conductivity, thermal, of nickel and alloys 1465
Conductivity, thermal, of sintered semiconductor alloys 147
Continuous saturation method for measuring electron spin–lattice relaxation times . 1566
Convolution 61
Convolution effects in electron energy-loss spectra 1397
Copper acetate monohydrate, radiation damage in 1533
Copper and gold, optical properties as a function of temperature 1835
Copper and silver, Hall coefficient of dilute alloys 1272
Copper, calculation of x-ray emission bands using APW Bloch functions 1808
Copper dodecaphosphomolybdate, electron spin resonance study of 858
Copper–manganese alloys, lattice distortion, elasticity and antiferromagnetic order in . 959
Copper–manganese alloys, Mössbauer studies of 2380
Correlation functions, zero-frequency anomalies 1196
Corundum, Jahn–Teller theory of Cr^{2+} in 2209
Corundum, lattice–ion interactions of Ti^{3+} in 1972
Corundum, lattice–ion interactions of Ti^{3+} in, Jahn–Teller effect 1947
Covalency in diamond-type semiconductors 719
Covalency in $MnCo_3$ 276
Covalency in silicon, germanium and grey tin 2373
Covalent and ionic models for electric field gradient in BeO 2301
Covalent charge transfer in III–V compounds 816
Cr : Al acetylacetonate, spin–lattice relaxation of 1376
Cr^{2+} in corundum, Jahn–Teller theory of 2209
Cr^{3+} ion in ruby, spin–lattice relaxation 1964
Critical behaviour in lattice statistics from series expansions 1889, 1900
Critical magnetic fluctuations in MnF_2 2022
Cross-relaxation between single ions and exchange-coupled clusters 1413
Crystal lattices, transport equations for hydrodynamic phenomena in 640
Crystalline systems, rapidly convergent pseudopotentials for 1206
Crystals, asymmetries in scattering x-rays and neutrons by 2262
Crystals, Cu^{2+} doped, electric field effects of 476
Crystals II, electrostatics of 1384
Crystals, magnetic, scattering matrices for Raman effect in 500
Crystals, symmetries of Zeeman effect for ions in 457
Crystal surfaces, low-energy diffraction from 996
Cubic crystal, departures from Garlands relation near a λ transion (L) 1352
Cu^+, conversion of Cu^{2+} to 1533
Cu^{2+}, conversion to Cu^+ of 1533
Cu^{2+}-doped crystals, electric field effects of 476
Cu^{2+} ions in zinc tungstate, electron spin resonance of 992
Curie temperature, anomalous specific heat near (L) 2435
Curie temperature of iron–palladium–hydrogen alloys, Mössbauer measurement . . . 2120
Current-carrying capacity of type II superconductors in mixed state, contribution of surface to 372
Current noise in thin gold films 298
Cytochrome c peroxidases, Mössbauer spectroscopy of 2246

	PAGE
Deconvolution	61
Defects, interaction of light with, in antiferromagnetic perovskites	2003
Defects, point, in cubic lattices, scattering of long-wavelength phonons by	252
Defects, scattering by acceptor, in GaSb and GaSb–InSb alloys (L)	1353
Density, electron state, in short range disordered chains	972
Density of states in a one-dimensional liquid	1683
Diagrammatic representation and Wick's theorem: perturbation theorem for spin-½ Heisenberg ferromagnet	704
Diamond-type semiconductors, electronic band structure and covalency in	719
Dielectric films, threshold energy in electron bombardment conductivity of	159
Dielectric loss functions, analysis of incomplete	1361
Dielectric properties of lead-activated sodium and potassium chloride crystals	603
Dielectric response of alkaline earth fluorides	1595
Dielectrics, amorphous, columnar ionization in electron bombardment conductivity of	152
Diffraction, electron, study of solidified mixtures of argon and krypton and of argon and neon	220
Diffraction, low-energy electron-application of pseudopotentials to	2273, 2283
Diffraction, low-energy, from crystal surfaces	996
Diffraction, neutron, by germania, silica, and radiation-damaged silica glasses	229
Diffraction, neutron, magnetic studies of annealed and alloyed chromium by	238
Diffraction study, neutron, of electrolytic gamma manganese (L)	761
Dilatometer, liquid gallium immersion, for range 50–700 °C	210
Dipolar-broadened electron resonance lines, saturation of	1512, 1528(L), 1529(L)
Disordered system, one-particle Green function for	1187
Disordered systems, non-perturbative evaluation of static electrical conductivity for	288
Disordered three-dimensional Hamiltonian, electron states in	1717
Disorder, entropy of, in alloy CuAu II (L)	760
Dispersion curve for single-particle excitations in the paramagnetic spin–phonon interaction	1777
Dispersion relation, magnon, and exchange relations in MnF_2	1168
Distortion, lattice, in copper–manganese alloys	959
Domain particles, temperature dependence of a random array	1537
Domains, acoustoelectric, in piezoelectric semiconductors	1299, 1309, 1321
Domain-wall motion in pure and ytterbium doped yttrium iron garnet	1926
Donor impurity band in zero magnetic field, evidence for	365
Dysprosium aluminium garnet, magneto-optical effects in	484
Dysprosium aluminium garnet, Monte Carlo calculation for	484
Dysprosium, magnetocrystalline anisotropy in	1016
Earth fluorides, alkaline, hyperfine interactions of hydrogen atoms in	404
Effective masses and perturbation theory in theory of simple metal	2350
Elastic constants, Garland's relation between and departures from (L)	1352
Elasticity in copper–manganese alloys	959
Elastic shear constants, use of, to test validity of model potential theories (L)	765
Electrical conduction of bismuth, size effect in	824
Electrical resistivities of alkali metals to pressures of 600 kbar	680
Electric field gradient in BeO, covalent and ionic models for	2301
Electron band structure of face-centred cubic manganese	1440
Electron bombardment conductivity in dielectric films, threshold energy in	159
Electron bombardment conductivity of amorphous dielectrics, columnar ionization in	152
Electron diffraction study of solidified mixtures of argon and krypton and of argon and neon	220
Electron energy-loss spectra, convolution effects in	1397
Electron fluid, phase transition of	193
Electron band structure in diamond-type semiconductors	719
Electronic states in long-period superlattice alloys	733
Electron in uniform field, exact propagator for	586
Electron microscopy, chromatic aberration in	2290
Electron paramagnetic resonance spectra of Cu^{2+}-doped crystals, electric field effects in	476
Electron paramagnetic transitions of hexammine nickel halides	1573
Electron–phonon interaction in modified tight-binding approximation	52
Electron resonance lines, dipolar-broadened, saturation of	1512, 1528(L), 1529(L)
Electron scattering, inelastic, in carbon and carbonaceous materials	2290

	PAGE
Electron scattering, small-angle plural	61
Electron spin resonance forbidden hyperfine transitions for cubic crystal-field symmetry (L)	2437
Electron spin resonance of vanadium in silver chloride	1751
Electron spin resonance spectra, rotational properties of	673
Electron spin resonance studies of ferric iron in perovskite-type oxides, millimetre waves	1146
Electron spin resonance study of chromium, manganese and iron in lead fluoride	1978
Electron spin resonance study of copper dodecaphosphomolybdate	858
Electron state density in short-range disordered chains	972
Electron states at surfaces	1797
Electron states in a three-dimensional disordered Hamiltonian	1717
Electron states, localized, non-exponential range of	1502
Electron transport in liquid metals	1454, 1446
Electron traps and recombination centres in KBr	1726
Electro-optical coefficients in zinc telluride, dispersion of	1085
Electro-optic coefficients for lithium niobate, signs of	855
Electro-optic Kerr effect in liquids of spherically symmetric molecules	2408
Electrostatic scattering of thermal neutrons by solids, theory of	981
Electrostatics of crystals II	1384
Emission edge, soft x-ray spectra of metals near	651
Emission processes in nickel-doped II–VI compounds, mechanism of	361
Energy band, narrow, ferromagnetism in	512
Energy bands, non-degenerate, ferromagnetism in	528
Energy levels of Er^{3+} in $LiYF_4$	593
Energy-loss spectra electron convolution effects in	1397
Energy–wave-number characteristics for simple metals	2335
Enhanced transition temperature, grain size in thin films	1697
Entropy anomalies, low temperature, of hexammine nickel halides	1573
Entropy of disorder in alloy CuAu II (L)	760
Equation of state near the critical point	1113
Er^{3+} in $LiYF_4$, energy levels of	593
Europium sulphide, specific heat of, comparison between theory and experiment (L)	755
Exchange and correlation corrections to optimized model potential	2071
Exchange interaction, effect of momentum dependence of, on Kondo temperature (L)	754
Exchange interactions, modified, in dilute alloys	1670
Exchange polarization in $MnCO_3$	276
Exchange relations in MnF_2 and magnon dispersion relation	1168
Excitation energies of coupled spin–phonon modes in paramagnets	1644
Excitations, magnetic, in non-ferromagnetic metals	84
Excitonic insulator, transition temperature of	583
Excitons, Mott–Wannier, interaction between in vibrating lattice	785
Expansion, thermal, of antimony and bismuth at low temperatures	116
Expansion, thermal, of bismuth at low temperatures	575
Expansion, thermal, of palladium–silver alloys at low temperatures	769
F centres in lithium fluoride in temperature range 25 °c to 400 °c, annealing of	18
FeF_2, spin-wave contribution to specific heat of	2329
^{57}Fe, hyperfine structure of 14·4 Kev Mössbauer gamma line of	1434
Fe–Ni Invar-type alloys, ultrasonic relaxation	2107
γ FeOOH, Mössbauer study of antiferromagnetism	1996
Ferric iron in perovskite-type oxides, e.s.r. studies of	1146
Ferromagnet, face-centred cubic, calculations on magnon impurity modes of pair defect in	345, 928
Ferromagnet, Heisenberg, spin-wave interactions in	539
Ferromagnetic alloys, theory of	124
Ferromagnetic cobalt–vanadium alloys, nuclear magnetic resonance in	259
Ferromagnetic metals, hyperfine fields on impurities in	1338
Ferromagnetic metals, nearly, collective effects in (L)	1693
Ferromagnetic metals, two-current conduction in	1784
Ferromagnetic Pd–Co and Pt–Co alloys, low-temperature specific heats of	135
Ferromagnetic states, absorption bands of gadolinium in	97
Ferromagnetism, absence in isotropic Heisenberg model with long-range interactions of	1531

	PAGE
Ferromagnetism in narrow energy band, correlation theory of	512
Ferromagnetism in non-degenerate energy bands	528
Ferromagnets, invariants from critical amplitudes (L)	1883, 2158
Ferrous ions in hafnium-doped yttrium iron garnet, characterization of	14
Fluorescence, absorption spectra of crystalline *trans*-stilbene	1560
Flux motion in superconductors	742
Flux vortices, pinned, response of to low-frequency fields	1492
Force constants in β brass	1872
Forbidden hyperfine electron spin resonance transitions for cubic crystal-field symmetry (L)	2437
Fractional nucleation rate concept	1550
Free electron gas, self-consistency conditions for localized magnetic moments in	1023
Functions, incomplete dielectric loss, analysis of	1361
Gadolinium aluminate, determination of magnetic structure of (L)	758
Gadolinium below 50 °K, magnetization curve of	339
Gadolinium in ferromagnetic and paramagnetic states, absorption bands of	97
Gadolinium, nuclear moments and hyperfine structure anomaly for	862
Gallium, lattice vibrations of, group theoretical analysis	882
Gallium phosphide, infra-red absorption of	2402
Galvanomagnetic effects in aluminium studied by means of helicon resonances	694
Gamma manganese, electrolytic neutron diffraction study of (L)	761
Garlands relation between elastic constants of a cubic crystal near a λ transition, departures from (L)	1352
Ga, thermal expansivities of	210
$GdCo_2$, spin echo study of ^{59}Co hyperfine field in	2237
Gd^{3+} in $LaEtSO_4$, zero-field splitting anomaly of (L)	1098
Germania, neutron diffraction by	229
Germanium, covalency in	2373
Germanium, heat capacity between 30 and 500 °c	1105
Gold, electron band structure (L)	1886
Grain size, enhanced transition temperature in thin films	1697
Graphite, ideal, residual resistivity of	2320
Green function, one particle, for a completely disordered system	1187
Green functions, zero-frequency anomalies	1196
Grey tin, covalency in	2373
Group theoretical analysis of lattice vibrations of gallium	882
de Haas–van Alphen measurements in indium	661
Haematite, Morin phase transition in	1606, 1614
Hafnium-doped yttrium iron garnet, characterization of ferrous ions in	14
Halides, alkali, interaction with platinum	1392
Hall coefficient of dilute alloys of copper and silver	1272
Hall mobility, high-field, in n-type silicon	2396
Hamiltonian, effective	2161
Hamiltonian for Jahn–Teller coupling of T_{1g} and T_{2g} ions	1934
Heat capacity of germanium between 30 and 500 °c	1105
Helicon resonances, galvanomagnetic effects in aluminium studied by means of	694
Heisenberg ferromagnet, spin-$\frac{1}{2}$, perturbation theory for	704, 711
Heisenberg ferromagnet, spin-wave interactions in	539
Heisenberg ferromagnets, spin-wave self-energy in	1174
Heisenberg model, isotropic, absence of ferromagnetism or antiferromagnetism in	1531
Helium II, liquid, condensation coefficient of	2414
Helmholtz free energy of a simple crystal model, temperature dependence of the anharmonic contribution	1542
Hexagonal metals, close-packed, hyperfine structure of 14·4 Kev Mössbauer gamma line in	1434
Hexammine nickel halides, electron paramagnetic transitions and low temperature anomalies	1573
^{80}Hg, shifts in x-ray L_{III} absorption edge of, due to chemical effects	104
Hg, thermal expansivities of	210
Hole centres trapped in CaF_2	1590
Hydrodynamic phenomena, transport equations for, in crystal lattices	640

PAGE

Hydrogen atoms, temperature dependence of hyperfine interactions of 404
Hyperfine coupling, transferred, phonon-induced corrections to 777
Hyperfine field, ^{59}Co, spin echo study of, in $GdCo_2$ 2237
Hyperfine fields on impurities in ferromagnetic metals 1338
Hyperfine interactions, temperature dependence of. 404
Hyperfine structure anomaly for gadolinium 862

Impurities, deep, photo-ionization in semiconductors of 1077
Impurities in ferromagnetic metals, hyperfine fields on 1338
Impurities, ionized, in semiconductors, magnetoresistance due to (L) 763
Impurities, non-magnetic, influence of normal d band on superconducting s band in two-band superconductors with 111
Impurity, charged, in magnetic field, screening of 852
Indium antimonide at low temperatures, microwave third harmonic generation in . . . 914
Indium antimonide, n-type, magnetic freeze-out in 365
Indium, de Haas-van Alphen measurements and band structure of 661
Inelastic scattering, simplifying effect of 2283
Infra-red absorption of beryllium in cadmium telluride 1129, 1137
Infra-red absorption of gallium phosphide containing boron 2402
Infra-red cyclotron resonance in n-type expitaxial InAs 2146
Insulator, excitonic, transition temperature of 583
Insulators, conductivity of 2181
Intensities, reflected, calculation of 2273
Internal field at ^{119}Sn nuclei in Co_2MnSn 2037
Invariants from critical amplitudes of ferromagnets (L) 1883, 2158
Ionic and covalent models for electric field gradient in BeO 2301
Ionic conductivity of potassium iodide crystals 167
Ionization, columnar, in the electron bombardment conductivity of amorphous dielectries . 152
Ions, Cu^{2+} and Ni^{2+}, electron spin resonance of 992
Ions, ferrous, in hafnium-doped yttrium iron garnet 14
Ions in crystals, symmetries of Zeeman effect for 457
Ions, iridium, hyperfine interactions of in $(NH_4)_2PtCl_6$ 1405
Ions, $3d^4$, Jahn–Teller effect of 444
Ions, magnetic, scattering of neutrons by 470
Ions, single, cross-relaxation with exchange-coupled clusters 1413
Iridium ions in $(NH_4)_2PtCl_6$, isolated and exchange-coupled, hyperfine interactions of . 1405
Iron in gold, dilute alloys, study of using Mössbauer effect 1258
Iron manganites, Mössbauer study of 1008
Irradiated rubies, relaxation processes in 2225
Ising chains, coupled, in rare-earth chlorides 75
Ising model with general spin, time-dependent susceptibility and neutron scattering cross section of 317
Isothermal susceptibility by Kubo formula, calculation of 1030
Isotropic differences in 0 °K volume and sublimation energies of solid neon and argon corr. 192
Isotopic volume differences in solid neon at 0 °K 2199
Isotropic Heisenberg model, absence of ferromagnetism or antiferromagnetism in . . 1531

Jahn–Teller coupling of $T_{1\varepsilon}$ and $T_{2\varepsilon}$ ions, Hamiltonian 1934
Jahn–Teller effect, lattice-ion interactions of Ti^{3+} in corundum 1947
Jahn–Teller effect of $3d^4$ ions 444
Jahn–Teller theory of Cr^{2+} in corundum 2209

KBr crystals, pure and impurity-doped, thermoluminescence of 796
KBr, heat capacity of 385, 393
KCl, heat capacity of 385, 393
KCl, thermal expansivities of 210
Kerr effect, electro-optic, in liquids of spherically symmetric molecules 2408
$KNiF_3$, superexchange interaction in 329
Knight shift in monovalent metals, pressure dependence 1661
Kohn anomalies in niobium 432
Kondo temperature, effect of momentum dependence of exchange interaction on (L) . . 754
Kubo formula, calculation of isothermal susceptibility by 1030

	PAGE
$LaCl_3$, pulsed field Zeeman studies of Ce^{3+} in	2310
$LaEtSO_4$, zero-field splitting anomaly of Gd^{3+} in (L)	1098
Laser-induced quasi-continuum, up-conversion of	577
Lattice, cubic, scattering of long-wavelength phonons by point defects in	252
Lattice distortion in copper–manganese alloys	959
Lattice dynamics of MnO	46
Lattice dynamics of niobium	421, 432
Lattice dynamics of tin telluride	1916
Lattice, inhomogeneous, critical behaviour of	929
Lattice–ion interactions of Ti^{3+} in corundum	1972
Lattice-ion interactions of Ti^{3+} in corundum, Jahn–Teller effect	1947
Lattice parameters, of some iron–palladium–hydrogen alloys, X-ray measurement	2120
Lattice statistics, critical behaviour from series expansions	1899, 1900
Lattice thermal conductivity of Ta–Nb and Nb–Mo solid solution alloys in normal and superconducting states	629
Lattice, vibrating, interaction between Mott–Wannier excitons in	785
Lattice vibrations of gallium metal, experimental determination of phonon dispersion relation	903
Lattice vibrations of gallium metal, group theoretical analysis	882
Lead-activated sodium and potassium chloride crystals, dielectric and optical properties of	603
Lead fluoride, e.s.r. study of chromium, manganese and iron in	1978
Lead, high-field magnetoresistance of	308
Liquid chains, non-exponential range of localized electron states in	1502
Liquid helium, cavitation pressure	1877
Liquid helium II, condensation coefficient of	2414
Liquid metals, electron transport in	1446, 1454
Liquid metals, temperature dependence of thermopowers of	1070
Liquid, non-uniform, molecular, distributions in	751
Liquid, one-dimensional, density of states	1683
Liquids, collective motion in	536
Liquid sodium, atomic motion in	2047
Liquids of spherically symmetric molecules, electro-optic Kerr effect in	2408
Lithium fluoride in the temperature range 25 °C to 400 °C, annealing of F centres in	18
Lithium hydride, crystalline, pseudopotential approach to	802
Lithium niobate, signs of electro-optic coefficients for	855
$LiYF_4$ doped with Er^{3+} : Yb^{3+}, quantum counter action	1908
$LiYF_4$, energy levels of Er^{3+} in	593
Localization of electrons in ordered and disordered systems	1230, 1704
Localized states, effect on impurity soft X-ray spectrum of dilute alloys of	1474
Localized states, non-existence in a three-dimensional disordered system	1717
Loss functions, dielectric, analysis of incomplete	1361

CONTENTS

No. 1 *January* 1969

PAPERS PAGE

Theory of cross-linked polymerized material. S. F. EDWARDS 1

Characterization of ferrous ions in hafnium-doped yttrium iron garnet J. M. ROBERTSON and D. ELWELL 14

The annealing of F centres in lithium fluoride in the temperature range 25 °C to 400 °C J. R. SERETLO and P. T. WEDEPOHL 18

Space-group corepresentations and magnon dispersion relations in NiF_2 S. J. JOSHUA and A. P. CRACKNELL 24

Stress and Zeeman spectra in bismuth-doped and undoped calcium oxide A. E. HUGHES and W. A. RUNCIMAN 37

Lattice dynamics of MnO B. C. G. HAYWOOD and M. F. COLLINS 46

Electron–phonon interaction in the modified tight-binding approximation. T. K. MITRA 52

Convolution, deconvolution and small-angle plural electron scattering D. L. MISELL and R. E. BURGE 61

Forced magnetostriction in the band model of magnetism E. P. WOHLFARTH 68

Coupled Ising chains and magnetic ordering in the rare-earth chlorides R. A. HUNT and D. J. NEWMAN 75

Spin waves and other magnetic excitations in non-ferromagnetic metals D. M. EDWARDS 84

Absorption bands of gadolinium in the ferromagnetic and paramagnetic states J. N. HODGSON and B. CLEYET 97

Calculation of the optical properties of aluminium A. J. HUGHES, D. JONES and A. H. LETTINGTON 102

Shifts in the X-ray L_{III} absorption edge of ^{80}Hg and ^{81}Tl due to chemical effects B. K. AGARWAL and L. P. VERMA 104

The possible use of the equations for the modulus and phase of the one-electron wave functions in band theory L. PINCHERLE 107

Influence of normal d band on superconducting s band in two-band superconductors with nonmagnetic impurities W. S. CHOW 111

The thermal expansion of antimony and bismuth at low temperatures G. V. BUNTON and S. WEINTROUB 116

Theory of ferromagnetic alloys H. S. D. COLE and R. E. TURNER 124

The low-temperature specific heats of a number of ferromagnetic Pd–Co and Pt–Co alloys J. C. G. WHEELER 135

The thermal conductivity of sintered semiconductor alloys J. E. PARROTT 147

Columnar ionization in the electron bombardment conductivity of amorphous dielectrics W. EHRENBERG and B. GHOSH 152

The threshold energy in the electron bombardment conductivity of dielectric films C. BOWLT and W. EHRENBERG 159

Ionic conductivity of potassium iodide crystals S. C. JAIN and D. C. PARASHAR 167

High-frequency acoustoelectric currents and departures from Ohm's law in thin platelets of CdS: I—Linear behaviour J. D. MAINES and E. G. S. PAIGE 175

BOOK REVIEWS 189

LETTERS TO THE EDITOR

Influence of anharmonicity on the parameters of an exponential potential for heavy rare gas solids N. P. GUPTA and R. K. GUPTA 190

CORRIGENDUM

Isotopic differences in the 0 °K volume and sublimation energies of solid neon and argon J. S. BROWN and J. L. FELDMAN 192

No. 2 *February* 1969

PAPERS PAGE

Phase transitions of the electron fluid . . N. WISER and M. H. COHEN 193
Condensation of high-energy atomic beams . . . . . B. N. CHAPMAN and D. S. CAMPBELL 200
Anharmonic effects in the thermodynamic properties of solids: III—A liquid gallium immersion dilatometer for the range 50–700 °C: thermal expansivities of Hg, Ga, NaCl and KCl . . . . . A. J. LEADBETTER and D. M. T. NEWSHAM 210
An electron diffraction study of solidified mixtures of argon and krypton and of argon and neon . . . . . A. E. CURZON and A. J. MASCALL 220
Neutron diffraction by germania, silica and radiation-damaged silica glasses . . . . . E. LORCH 229
Magnetic studies of annealed and alloyed chromium by neutron diffraction . . . . . G. E. BACON and N. COWLAM 238
Scattering of long-wavelength phonons by point defects in cubic lattices . . . . . BAL KRISHNA AGRAWAL 252
Nuclear magnetic resonance in ferromagnetic cobalt–vanadium alloys . . . . . P. C. RIEDI, R. G. SCURLOCK and T. H. WILMSHURST 259
A pulsed double resonance study of the nuclear quadrupole interactions of ^{14}N in $NH_4H_2PO_4$ . . . . . A. HARTLAND 264
Covalency and exchange polarization in $MnCO_3$ . . . . . P. A. LINDGÅRD and W. MARSHALL 276
Non-perturbative evaluation of the static electrical conductivity for disordered systems . . . . . J. RUBIO 288
Current noise in thin gold films . J. L. WILLIAMS and R. K. BURDETT 298
The high-field magnetoresistance of lead . . . . D. CAROLINE 308
Time-dependent susceptibility and neutron scattering cross section of the Ising model with general spin . . J. W. ESSAM and H. GARELICK 317
The superexchange interaction in $KNiF_3$ . . . . D. E. RIMMER 329
Magnetization curve of gadolinium below 50 °K . . W. N. R. STEVENS 339
Calculations on magnon impurity modes of a pair defect in a face-centred cubic ferromagnet . . . . . E. FRIKKEE 345
Antiferromagnetism in Au_5Mn_2 . . . J. H. SMITH and P. WELLS 356
Mechanism of emission processes in nickel-doped II–VI compounds . . . M. L. REYNOLDS, W. E. HAGSTON and G. F. J. GARLICK 361
Magnetic freeze-out in n-type indium antimonide and evidence for a donor impurity band in zero magnetic field P. E. HANLEY and E. H. RHODERICK 365
Contribution of the surface to the current-carrying capacity of type II superconductors in the mixed state . . . . . J. LOWELL 372

LETTERS TO THE EDITOR
Superconductivity in thin films of beryllium A. E. CURZON and A. J. MASCALL 382

No. 3 *March* 1969

PAPERS
Anharmonic effects in the thermodynamic properties of solids: IV—The heat capacities of NaCl, KCl and KBr between 30 and 500 °C . . . . . A. J. LEADBETTER and G. R. SETTATREE 385
Anharmonic effects in the thermodynamic properties of solids: V—Analysis of data for NaCl, KCl and KBr . . . . . A. J. LEADBETTER, D. M. T. NEWSHAM and G. R. SETTATREE 393
The temperature dependence of the hyperfine interactions of hydrogen atoms in the alkaline earth fluorides . . . . . J. W. HODBY 404

No. 3 (*cont.*) *March* 1969

PAPERS PAGE

Nuclear spin–lattice relaxation by two-fold correlated spin reorientation . . . . . J. L. PAGE, F. A. RUSHWORTH and D. P. TUNSTALL 410

Nuclear spin–lattice relaxation in ethylene and *trans*-dichloroethylene . . . . . J. L. PAGE and F. A. RUSHWORTH 415

The lattice dynamics of niobium: I—Measurements of the phonon frequencies . . . . . R. I. SHARP 421

The lattice dynamics of niobium: II—Kohn anomalies in niobium R. I. SHARP 432

The Jahn–Teller effect of octahedrally co-ordinated $3d^4$ ions . . . . . J. R. FLETCHER and K. W. H. STEVENS 444

Symmetries of the Zeeman effect for ions in crystals . . J. J. EARNEY 457

Exchange enhancement of nuclear spin–lattice relaxation A. BROOKS HARRIS 463

Some aspects of the theory of the scattering of neutrons by magnetic ions . . . . . S. W. LOVESEY 470

Electric field effects in electron paramagnetic resonance spectra of Cu^{2+}-doped crystals . . . . . C. A. BATES 476

Magneto-optical effects and a Monte Carlo calculation for dysprosium aluminium garnet . K. A. GEHRING, M. J. M. LEASK and J. H. M. THORNLEY 484

Scattering matrices for the Raman effect in magnetic crystals A. P. CRACKNELL 500

Correlation theory of ferromagnetism in a narrow energy band M. J. MORRIS 512

Ferromagnetism in narrow non-degenerate energy bands—a variational principle . . . . . P. RICHMOND and G. RICKAYZEN 528

Spin-wave interactions in a Heisenberg ferromagnet . . . . . W. MARSHALL and G. MURRAY 539

Collective motion in liquids . . . . J. HUBBARD and J. L. BEEBY 556

BOOK REVIEWS 572

LETTERS TO THE EDITOR

Thermal expansion of bismuth at low temperatures . . G. K. WHITE 575

No. 4 *April* 1969

PAPERS

Up-conversion of a laser-induced quasi-continuum . . . . . M. D. MARTIN and E. L. THOMAS 577

On the transition temperature of an excitonic insulator . . . . . B. Y. TONG and W. S. CHOW 583

The exact propagator for an electron in a uniform electric field and its application to Stark effect calculations . . T. LUKES and K. T. S. SOMARATNA 586

Energy levels of Er^{3+} in $LiYF_4$ . . . . . M. R. BROWN, K. G. ROOTS and W. A. SHAND 593

Dielectric and optical properties of lead-activated sodium and potassium chloride crystals . . . . . J. S. DRYDEN and G. G. HARVEY 603

Transverse magneto-plasma wave propagation in a periodic structure . . . . . A. C. BAYNHAM and A. D. BOARDMAN 619

Lattice thermal conductivity of Ta–Nb and Nb–Mo solid solution alloys in normal and superconducting states . . . . . J. B. SOUSA 629

Transport equations for hydrodynamic phenomena in crystal lattices . . . . . J. RANNINGER 640

The soft x-ray spectra of metals near the emission edge . . . . . B. BERGERSEN and F. BROUERS 651

de Haas–van Alphen measurements and the band structure of indium . . . . . A. J. HUGHES and J. P. G. SHEPHERD 661

Rotational properties of electron spin resonance spectra . . D. R. HUTTON 673

PAPERS PAGE

Electrical resistivities of the alkali metals to pressures of 600 kbar . . . . . G. M. Stocks and W. H. Young 680
Galvanomagnetic effects in aluminium studied by means of helicon resonances . . . . . T. Amundsen and P. Seeberg 694
Perturbation theory for the spin-½ Heisenberg ferromagnet: I—Wick's theorem and diagrammatic representation . . . . . A. Kühnel 704
Perturbation theory for the spin-½ Heisenberg ferromagnet: II—Thermodynamic behaviour . . . . . A. Kühnel 711
Electronic band structure and covalency in diamond-type semiconductors . . . . . V. Heine and R. O. Jones 719
Electronic states in long-period superlattice alloys . . . . . H. Jones 733
Flux motion, electrical resistance and noise in superconductors J. G. Park 742
Molecular distributions in a non-uniform liquid . J. Hales and A. Suddaby 751

LETTERS TO THE EDITOR

The effect of the momentum dependence of the exchange interaction on the Kondo temperature . . . . . C. F. Osborne 754
Specific heat of europium sulphide: a comparison between theory and experiment . . . . . C. Domb and R. G. Bowers 755
Note on the determination of the magnetic structure of gadolinium aluminate . . . . . Y. Tenenbaum 758
The entropy of disorder in the alloy CuAu II . . . . . H. Jones 760
A neutron diffraction study of electrolytic gamma manganese . . . . . J. H. Smith and E. R. Vance 761
Magnetoresistance due to ionized impurities in semiconductors . . . . . V. V. Paranjape and M. H. Hawton 763
The use of elastic shear constants to test the validity of model potential theories . . . . . C. S. G. Cousins 765
CORRIGENDA 768

PAPERS

The thermal expansion of palladium–silver alloys at low temperatures . . . . . A. C. Bailey, N. Waterhouse and B. Yates 769
Phonon-induced corrections to the transferred hyperfine coupling . . . . . K. N. Shrivastava 777
The interaction between Mott–Wannier excitons in a vibrating lattice . . . . . P. P. Schmidt 785
Thermoluminescence of pure and impurity-doped KBr and NaCl crystals . . . . . P. C. Mehendru and S. Radhakrishna 796
A pseudopotential approach to crystalline lithium hydride K.-F. Berggren 802
Covalent charge transfer in III–V compounds . . . . . A. E. Attard, F. A. Mifsud, A. K. Sant and J. A. Sultana 816
Size effect in the electrical conduction of bismuth . . . . . J. E. Aubrey and C. J. Creasey 824
Calculation of transition-metal band structures D. M. Hum and K. C. Wong 833
The choice of muffin-tin pseudopotential . J. B. Pendry and G. Capapt 841
Screening of a charged impurity in a magnetic field A. K. Das and E. de Alba 852
The signs of the electro-optic coefficients for lithium niobate . . . . . K. F. Hulme, P. H. Davies and V. M. Cound 855
An electron spin resonance study of copper dodecaphosphomolybdate . . . . . D. J. Saunders and K. J. Standley 858

PAPERS PAGE

Nuclear moments and hyperfine structure anomaly for gadolinium . . . . . J. M. Baker, G. M. Copland and B. M. Wanklyn 862

A pulsed neutron diffraction measurement of preferred orientation in pressed powder compacts of bismuth seleno-teluride . . . . . D. H. Day and R. N. Sinclair 870

Magnons in antiferromagnetic NiO, MnO and α-MnS . . . . . J. A. Reissland and N. A. Begum 874

Lattice vibrations of gallium metal: I—Group theoretical analysis . . . . . W. B. Waeber 882

Lattice vibrations of gallium metal: II—Experimental determination of the phonon dispersion relation . . . . . W. B. Waeber 903

Microwave third harmonic generation in indium antimonide at low temperatures . . . . . M. S. Sodha and S. K. Sharma 914

BOOK REVIEWS 922

LETTERS TO THE EDITOR

Band structures of α- and γ-cerium G. Mukhopadhyay and C. K. Majumdar 924

Metamagnetism in $UP_{0.75}S_{0.25}$ . . . . . J. Crangle, M. Kuznietz, G. H. Lander and Y. Baskin 925

CORRIGENDUM

Calculations on magnon impurity modes of a pair defect in a face-centered cubic ferromagnet . . . . . E. Frikkee 928

No. 6 *June* 1969

PAPERS

Second sound in solids . . . . . J. Ranninger 929

Padé approximant analysis of the Ising model specific heat above the Curie temperature . . . . . D. L. Hunter 941

Critical behaviour of inhomogeneous lattices . . . . . P. G. Watson 948

Lattice distortion, elasticity and antiferromagnetic order in copper–manganese alloys . . . . . P. Makhurane and P. Gaunt 959

Low-energy diffraction from crystal surfaces: II—A clean surface . . . . . C. M. K. Watts 966

Electron state density in short-range-disordered chains . . . . . A. P. Roberts, P. L. Jones and P. V. Smith 972

The theory of the electrostatic scattering of thermal neutrons by solids . . . . . S. W. Lovesey 981

Thermoluminescence of strontium-doped sodium chloride . . . . . R. V. Joshi and S. V. Shah 988

The electron spin resonance of Cu^{2+} and Ni^{2+} ions in zinc tungstate . . . . . R. J. Riggs and K. J. Standley 992

Subsidiary resonances in nuclear magnetic resonances . . . . . J. T. Daycock and G. P. Jones 998

Mössbauer study of manganites . . . . . M. Bornaz, G. Filoti, A. Gelberg and M. Rosenberg 1008

Spin-wave theory of magnetocrystalline anisotropy in terbium and dysprosium . . . . . M. S. S. Brooks 1016

Self-consistency conditions for localized magnetic moments in a free electron gas . . . . . M. J. Lawrence and F. Persico 1023

Calculation of the isothermal susceptibility by the Kubo formula . . . . . T. Morita and S. Katsura 1030

PAPERS PAGE

Application of model potentials to the phonon spectrum of magnesium . . . . . A. J. Pindor and R. Pynn 1037
An energy-independent method of band-structure calculation for transition metals . . . . . D. G. Pettifor 1051
Temperature dependence of the thermopowers of liquid metals . . . . . D. E. Thornton and W. H. Young 1070
Photo-ionization of deep impurities in semiconductors . . J. W. Allen 1077
On the dispersion of optical and electro-optical coefficients in zinc telluride . . . . . H. Pursey, P. A. Page and M. J. P. Musgrave 1085
Superconductivity in one-dimensional systems . . M. R. Bhagavan 1092

BOOK NOTICES 1097

LETTERS TO THE EDITOR
The zero-field splitting anomaly of Gd^{3+} in $LaEtSO_4$ . . . . . J. R. Dagg, R. C. Kemp and H. F. Symmons 1098
Paramagnetic resonance of an N centre in calcium oxide . R. G. Bessent 1101

PAPERS

Anharmonic effects in the thermodynamic properties of solids: VI—Germanium: heat capacity between 30 and 500 °c and analysis of data . . . . . A. J. Leadbetter and G. R. Settatree 1105
Equation of state near the critical point . . . . B. D. Josephson 1113
Thermoluminescence of potassium azide . . . . P. D. Townsend 1116
Thermoluminescence of sodium azide . . . . . P. J. Kemmey, P. D. Townsend and P. W. Levy 1125
Infra-red absorption of beryllium in cadmium telluride: I . . . . . W. Hayes and A. R. L. Spray 1129
Infra-red absorption of beryllium in cadmium telluride: II . . . . . C. T. Sennett, D. R. Bosomworth, W. Hayes and A. R. L. Spray 1137
Millimeter wave e.s.r. studies of ferric iron in perovskite-type oxides . . . . . R. G. Pontin, E. F. Slade and D. J. E. Ingram 1146
On the theory of the scattering of neutrons by magnetic ions in crystals . . . . . D. F. Johnston and D. E. Rimmer 1151
Magnon dispersion relation and exchange interactions in MnF_2 . . . . . O. Nikotin, P. A. Lindgård and O. W. Dietrich 1168
Some aspects of the calculations of the spin-wave self-energy in Heisenberg ferromagnets . . . . . E. Balcar 1174
One-particle Green functions for a completely disordered system . R. Jones 1187
Correlation functions and Green functions: zero-frequency anomalies . . . . . P. C. Kwok and T. D. Schultz 1196
Rapidly convergent pseudopotentials for crystalline systems . R. L. Jacobs 1206
The application of pseudopotentials to low-energy electron diffraction: I—Calculation of the potential and 'inner potential' . . J. B. Pendry 1215
The approximate calculation of electronic band structures III J. Hubbard 1222
Localization of electrons in ordered and disordered systems: II—Bound bands . . . . . J. M. Ziman 1230
The screened uniform charge model for nearly-free electron metals M. A. Ball 1248
A study of dilute alloys of iron in gold using the Mössbauer effect . . . . . M. S. Ridout 1258
The Hall coefficient of dilute alloys of copper and silver. . . . . J. S. Dugdale and L. D. Firth 1272

No. 7 (*cont.*) *July* 1969

PAPERS PAGE

Perturbation theory and alloying behaviour: I—Formalism J. E. INGLESFIELD 1285
Perturbation theory and alloying behaviour: II—The mercury–magnesium system J. E. INGLESFIELD 1293
A theory of acoustoelectric domains in piezoelectric semiconductors: I—Linear regime B. K. RIDLEY and J. WILKINSON 1299
A theory of acoustoelectric domains in piezoelectric semiconductors: II—Non-linear interactions B. K. RIDLEY and J. WILKINSON 1307
A theory of acoustoelectric domains in piezoelectric semiconductors: III—Domain solution B. K. RIDLEY and J. WILKINSON 1321
Bernoulli potentials in superconductors G. RICKAYZEN 1334
Hyperfine fields on impurities in ferromagnetic metals I. A. CAMPBELL 1338

LETTERS TO THE EDITOR

Note on departures from Garland's relation between the elastic constants of a cubic crystal near a λ-transition P. G. WRIGHT 1352
Phonon scattering by acceptor defects in GaSb and GaSb–InSb alloys A. G. BRIGGS and L. J. CHALLIS 1353
The rigid-ion method in the Wannier representation T. K. MITRA 1357

No. 8 *August* 1969

PAPERS

Analysis of incomplete dielectric loss functions A. R. MORLEY 1361
Spin relaxation through modulating the orientation J. LEVY 1371
Spin–lattice relaxation of Cr:Al acetylacetonate D. E. DUGDALE and J. S. THORP 1376
The electrostatics of crystals II F. A. JOHNSON 1384
A capacitance enhancement resulting from the interaction of platinum with the alkali halides D. F. GIBBS and B. W. JONES 1392
Convolution effects in electron energy-loss spectra recorded by electron transmission R. E. BURGE and D. L. MISELL 1397
The hyperfine interactions of isolated and of exchange-coupled iridium ions in $(NH_4)_2PtCl_6$ J. J. DAVIES and L. J. OWEN 1405
Cross-relaxation between single ions and exchange-coupled clusters E. A. HARRIS 1413
Paramagnetic resonance of associated impurities in cadmium sulphide R. C. KEMP 1416
Time-reversal degeneracy in the electronic band structure of a magnetic metal A. P. CRACKNELL 1425
Hyperfine structure of the 14·4 Kev Mössbauer gamma line of ^{57}Fe in close-packed hexagonal metals S. M. QAIM 1434
Electron band structure of face-centred cubic manganese G. C. FLETCHER 1440
Electron transport in liquid metals: I—The Boltzmann equation G. J. MORGAN 1446
Electron transport in liquid metals: II—A model for the wave functions in liquid transition metals G. J. MORGAN 1454
The thermal conductivity of nickel and its alloys T. FARRELL and D. GREIG 1465
The effect of localized states on the impurity soft X-ray spectrum of dilute alloys M. J. STOTT 1474
High-frequency transport properties of a many-valley semiconductor having anisotropic scattering time S. K. ROY 1487
The response of pinned flux vortices to low-frequency fields A. M. CAMPBELL 1492

No. 8 (*cont.*) *August* 1969

PAPERS PAGE

Non-exponential range of localized electron states in liquid chains . . . . . A. P. ROBERTS, P. L. JONES, K. E. KHOR and P. V. SMITH 1502

The saturation of dipolar-broadened electron resonance lines in the presence of a phonon bottleneck . . . . . J. C. GILL and N. P. VINALL 1512

LETTERS TO THE EDITOR

Magnetic resonance saturation and thermodynamics: comments on a paper by J. C. Gill and N. P. Vinall . . . . . S. CLOUGH 1528

Magnetic resonance saturation and thermodynamics: a reply to comments by S. Clough on a paper by J. C. Gill and N. P. Vinall . . . J. C. GILL 1529

Absence of ferromagnetism or antiferromagnetism in the isotropic Heisenberg model with long-range interactions . . . . . G. S. JOYCE 1531

The conversion of Cu^{2+} to Cu^{+} due to radiation damage in copper acetate monohydrate . . . . . F. APAYDIN and S. CLOUGH 1533

No. 9 *September* 1969

PAPERS

The temperature dependence of the coercivity of a random array of uniaxial domain particles . . . . . I. JOFFE 1537

On the temperature dependence of the cubic anharmonic contribution to the Helmholtz free energy of a simple crystal model . . . . . M. L. KLEIN, V. V. GOLDMAN and G. K. HORTON 1542

Initial growth of thin films; the fractional nucleation rate concept . . . . . B. N. CHAPMAN and M. R. JORDAN 1550

Absorption and fluorescence spectra of crystalline *trans*-stilbene . . . . . M. K. CHAUDHURI and S. C. GANGULY 1560

A critical assessment of the continuous saturation method for measuring electron spin–lattice relaxation times in the presence of a phonon bottleneck . . . . . R. A. VAUGHAN 1566

An explanation of the electron paramagnetic transitions and low temperature entropy anomalies of hexammine nickel halides . . . . . A. R. BATES and K. W. H. STEVENS 1573

Spin polarization due to s–d interaction . . . . . C. MANOHAR 1586

The structure of some trapped hole centres in CaF_2: I . . . . . T. P. P. HALL, A. LEGGEAT and J. W. TWIDELL 1590

Dielectric response of the alkaline earth fluorides . . . . R. P. LOWNDES 1595

The Morin phase transition in haematite (α-Fe_2O_3): I—A group-theoretic model . . . . . D. C. HERBERT 1606

The Morin phase transition in haematite (α-Fe_2O_3): II—Free spin waves . . . . . D. C. HERBERT 1614

The effects of magnon–magnon interaction on the two-magnon spectra of antiferromagnets . . . . . R. J. ELLIOTT and M. F. THORPE 1630

The interpretation of the excitation energies of coupled spin–phonon modes in paramagnets . . . . . F. W. SHEARD and G. A. TOOMBS 1644

Thermodynamic properties of nickel near the Curie temperature . . . . . J. MATHON and E. P. WOHLFARTH 1647

Nuclear contact densities for valence electrons in metals . . . . . E. T. MICAH, G. M. STOCKS and W. H. YOUNG 1653

Pressure dependence of the Knight shift in monovalent metals . . . . . E. T. MICAH, G. M. STOCKS and W. H. YOUNG 1661

Modified exchange interactions in dilute alloys . . . . . J. A. BLACKMAN and R. J. ELLIOTT 1670

The density of states of a one-dimensional liquid . . . . R. JONES 1683

No. 9 (*cont.*) *September* 1969

PAGE

BOOK REVIEWS 1692

LETTERS TO THE EDITOR

Collective effects in nearly ferromagnetic metals . . . . . K. P. JAIN and A. K. RAJOGOPAL 1693

The theoretical and experimental moment functions of the phonon spectrum of caesium halides . . . . . L. M. TIWARI 1695

No. 10 *October* 1969

PAPERS

Grain size and enhanced transition temperature in quenched thin films . . . . . R. WATTON 1697

The localization of electrons in ordered and disordered systems: III—Quantum-mechanical particles in 'free' bands . . . . . J. M. ZIMAN 1704

Exactly solvable model of electronic states in a three-dimensional disordered Hamiltonian: non-existence of localized states . . . . P. LLOYD 1717

Electron traps and recombination centres in KBr . . . . . C. D. CLARK and D. H. NEWMAN 1726

The expansion of the carbon–carbon bond length in potassium graphites . . . . . D. E. NIXON and G. S. PARRY 1732

The anisotropic pressure dependence of conduction in well-oriented pyrolytic graphite: I—Non-oscillatory effects and the role of the carrier–carrier scattering . . . . . M. L. YEOMAN and D. A. YOUNG 1742

Electron spin resonance of vanadium in silver chloride . . . . . S. U. CHEEMA and M. J. A. SMITH 1751

The acoustic paramagnetic resonance of vanadium doped magnesium oxide . . . . . R. G. BRABIN-SMITH and V. W. RAMPTON 1759

The determination of the symmetries of paramagnons, with applications to MnF_2 and NiF_2 . . . . . A. P. CRACKNELL 1764

Dispersion curve for single-particle excitations in the paramagnetic spin–phonon interaction . . . . . C. LEONARDI and F. PERSICO 1777

Two-current conduction in ferromagnetic metals and spin wave–electron collisions . . . . . A. FERT 1784

A new method in the quantum theory of surface states . . . . . F. GARCIA-MOLINER and J. RUBIO 1789

A new formalism for electron states at surfaces: II—Application to surface states . . . . . F. GARCIA-MOLINER, V. HEINE and J. RUBIO 1797

Relativistic theory of Tamm surface states S. G. DAVISON and M. STĘŚLICKA 1802

Calculations of the x-ray emission bands of copper using APW Bloch functions . . . . . D. A. GOODINGS and R. HARRIS 1808

Temperature dependence of x-ray absorption fine structure in metals . . . . . J. A. JOPE 1817

Study of potentials suitable for band structure calculations of the noble metals: II—Silver and gold . . R. A. BALLINGER and C. A. W. MARSHALL 1822

The optical properties of copper and gold as a function of temperature . . . . . M. SHIGA and G. P. PELLS 1835

The optical properties of nickel above and below the Curie temperature . . . . . G. P. PELLS and M. SHIGA 1847

Phonon dispersion curves of zinc . . . . . D. L. MCDONALD, M. M. ELCOMBE and A. W. PRYOR 1857

Surface resistance and effective permeability of rare earth metals at microwave frequencies . . T. G. EMELEUS and M. A. H. MCCAUSLAND 1867

Identification of force constants in β-brass J. C. NORVELL and J. ALS-NIELSEN 1872

The cavitation pressure of liquid helium D. GERAGHTY and D. H. TREVENA 1877

No. 10 (*cont.*) *October* 1969

LETTERS TO THE EDITOR PAGE

Formation of invariants from critical amplitudes of ferromagnets P. G. WATSON 1883
Electron band structure of gold . . S. KUPRATAKULN and G. S. FLETCHER 1886

No. 11 *November* 1969

PAPERS

Determination of critical behaviour in lattice statistics from series expansions II . . . . C. J. THOMPSON, A. J. GUTTMANN and B. W. NINHAM 1889
Determination of critical behaviour in lattice statistics from series expansions III . . . . . A. J. GUTTMANN 1900
Quantum counter action in Er^{3+}: Yb^{3+} doped $LiYF_4$ . . . . . M. R. BROWN and W. A. SHAND 1908
The lattice dynamics of tin telluride . . . . . E. R. COWLEY, J. K. DARBY and G. S. PAWLEY 1916
Damping of magnetic domain-wall motion in pure and ytterbium-doped yttrium iron garnet . . . . . H. HARPER and R. W. TEALE 1926
An effective Hamiltonian for the Jahn–Teller coupling of T_{1g} and T_{2g} ions . . . . . K. W. H. STEVENS 1934
Lattice–ion interactions of Ti^{3+} in corundum: I—The Jahn–Teller effect and the theory of the effects of electric field and strain . . . . . C. A. BATES and J. P. BENTLEY 1947
Lattice–ion interactions of Ti^{3+} in corundum: II—The experimentally observed effects of electric fields . . . . B. F. JONES and W. S. MOORE 1964
Zero-field spin–lattice relaxation of the Cr^{3+} ion in ruby . . . . . C. A. BATES, J. P. BENTLEY, R. A. LEES and W. S. MOORE 1970
An electron spin resonance study of chromium, manganese and iron in single crystals of lead fluoride. . . . . K. K. CHAN and L. SHIELDS 1978
X-ray diffraction study of the charge distribution in niobium monocarbide . . M. MERISALO, O. INKINEN, M. JÄRVINEN and K. KURKI-SUONIO 1984
X-ray research of some photocitalls (pyroceramics) . . . . . G. V. DAVYDOV, A. S. KRASNIKOV and A. I. BEREZHNOI 1992
X-ray determination of the region of coherent scattering in photocitalls (pyroceramics) . G. V. DAVYDOV, A. S. KRASNIKOV and N. A. JOHROKHOV 1994
Antiferromagnetism of γ FeOOH: a Mössbauer effect study . C. E. JOHNSON 1996
Interaction of light with defects in antiferromagnetic perovskites . . . . . J. B. PARKINSON 2003
Optical properties of layer antiferromagnets with K_2NiF_4 structure . . . . . J. B. PARKINSON 2012
Critical magnetic fluctuations in MnF_2 . . . . O. W. DIETRICH 2022
The sign of the internal field at ^{119}Sn nuclei in Co_2MnSn J. M. WILLIAMS 2037
Atomic motion in liquid sodium: I—Diffusive motion . . S. J. COCKING 2047
A model to predict the multiple emission distribution of secondary electrons from metals . . . . . R. C. DOUGAL 2063
Optimized model potential: exchange and correlation corrections and calculation of magnesium phonon spectrum . . R. W. SHAW, JR., and R. PYNN 2071
Band structure effects in silver–palladium alloys P. M. LEE and P. E. LEWIS 2089
Resistance due to potential scattering in dilute magnetic alloys . . . . . J. A. BLACKMAN and R. J. ELLIOTT 2099
Ultrasonic relaxation effects in the Fe–Ni Invar type alloys . R. FLETCHER 2107
Thermopowers and resistivities of some Ag–Pd–Cd alloys with constant electron densities . . . . . R. D. BARNARD 2114
Mössbauer measurement of Curie temperatures and x-ray measurement of lattice parameters of some iron–palladium–hydrogen alloys . . . . . J. S. CARLOW and R. E. MEADS 2120

No. 11 (*cont.*) *November* 1969

PAPERS PAGE

Field effects in oscillatory photoconductivity. J. R. BARKER and C. J. HEARN 2128
The thermal conductivity of cadmium arsenide . . . . . D. ARMITAGE and H. J. GOLDSMID 2138
Infra-red cyclotron resonance in n-type epitaxial InAs with evidence of polaron coupling . . . . C. W. LITTON, R. B. DENNIS and S. D. SMITH 2146

LETTERS TO THE EDITOR

Order–disorder transformations in rubidium and caesium graphites . . . . . G. S. PARRY, D. E. NIXON, K. M. LESTER and B. C. LEVENE 2156
Further critical invariants of ferromagnets . . . . P. G. WATSON 2158

No. 12 *December* 1969

PAPERS

An effective Hamiltonian and time-independent perturbation theory . . . . . C. E. SOLIVERES 2161
Theory of resistive anomaly in a superconductor above a second-order critical magnetic field . . . . . D. R. TILLEY and J. B. PARKINSON 2175
The thermally stimulated luminescence and conductivity of insulators . . . . . I. J. SAUNDERS 2181
Isotopic volume differences in solid neon at $T = 0$ °K . . J. S. BROWN 2199
Jahn–Teller theory of Cr^{2+} in corundum . C. A. BATES and J. M. DIXON 2209
Relaxation processes in irradiated rubies . C. A. BATES and J. M. DIXON 2225
A spin echo study of the ^{59}Co hyperfine field in $GdCo_2$ and several related series of substitutional compounds . K. N. R. TAYLOR and J. T. CHRISTOPHER 2237
Mössbauer spectroscopy of protohaem and mesohaem cytochrome c peroxidases and their fluorides . . G. LANG, T. ASAKURA and T. YONETANI 2246
Asymmetries in the scattering of x-rays and neutrons by crystals . . . . . R. A. COWLEY and W. J. L. BUYERS 2262
The application of pseudopotentials to low-energy electron diffraction: II —Calculation of the reflected intensities . . . . J. B. PENDRY 2273
The application of pseudopotentials to low-energy electron diffraction: III—The simplifying effect of inelastic scattering . . . . J. B. PENDRY 2283
Inelastic electron scattering in carbon and carbonaceous materials and chromatic aberration in electron microscopy . . D. L. MISELL and R. A. CRICK 2290
Paramagnetic resonance of Tb^{4+} in zircon . D. R. HUTTON and R. J. MILNE 2297
Covalent and ionic models for the electric field gradient in BeO . . . . . C. A. SHOLL and J. A. WALTER 2301
Pulsed field Zeeman studied of Ce^{3+} in $LaCl_3$ . . . . . D. M. S. BAGGULEY and G. VELLA-COLEIRO 2310
Residual resistivity of ideal graphite . A. D. BOARDMAN and D. G. GRAHAM 2320
The spin-wave contribution to the specific heat of MnF_2, FeF_2, COF_2 and NiF_2 . N. A. BEGUM, A. P. CRACKNELL, S. J. JOSHUA and R. A. REISSLAND 2329
Application of the optimized model potential to calculation of energy–wave-number characteristics for simple metals . . R. W. SHAW, JR. 2335
Effective masses and perturbation theory in the theory of simple metals . . . . . R. W. SHAW, JR. 2350
Measurements of the frequencies of the normal modes of zinc . . . . . A. J. MILLINGTON and G. L. SQUIRES 2366
On the structure of the transition metals: II—Computed densities of states . . . . . N. W. DALTON and R. A. DEEGAN 2369
Covalency in silicon, germanium and grey tin . . . . . M. JAROŠ and P. K. W. VINSOME 2373

PAPERS PAGE

Mössbauer studies of copper manganese alloys with dilute ^{119}Sn B. WINDOW 2380

Magneto-Seebeck and Nernst effects in cadmium arsenide . . . . . D. ARMITAGE and H. J. GOLDSMID 2389

Room temperature high-field Hall mobility in n-type silicon . . . . . P. K. BASU and B. R. NAG 2396

Infra-red absorption of gallium phosphide containing boron . . . . . W. HAYES, H. F. MACDONALD and C. T. SENNETT 2402

The electro-optic Kerr effect in liquids of spherically symmetric molecules . . . . . J. A. BRACE and J. V. CHAMPION 2408

The condensation coefficient of liquid helium II . . . . . G. H. HUNTER and D. V. OSBORNE 2414

BOOK REVIEWS 2425
